

# Push Button Paging

**HME**

WIRELESS

Onsite Paging

## For In-Theater Paging

### Improve Service & Customer Experience

Invite select customers to carry a Push Button Paging System hand-held transmitter into the theater. Ask the customer to alert your manager if there is a problem in their theater by simply pushing the button that corresponds with the problem:

- > Sound
- > Picture
- > Piracy
- > Other disturbance

Silent alerts go to the manager telling them which theater is reporting a problem and the nature of the problem.

Benefits include:

- > Quick response to sound or picture issues
- > Reward your select customers with concession discounts or coupons, tickets or loyalty program credits
- > Improve the experience for all of your moviegoers and increase your profits

Provide a friendly environment for all moviegoers.

## Push Button Paging Highlights

- > **Simple Self-Installation**  
Installation is simple and easy.
- > **Easy to Use**  
Patrons simply push the button on the transmitter that corresponds with the problem. Managers receive a page that tells them the nature of the problem and in which theater.
- > **Discreet Notification**  
Transmitter does not make any sound or light when used, keeping the notification anonymous.
- > **No Software Required**  
No annual licensing fees or complicated set-up is required.
- > **Simple to Manage**  
Return the transmitters and manager pagers to the charger at the end of the night and they will be ready the next day.
- > **Small Footprint**  
Transmitters and manager pagers charge in the same charging station.
