Table Status Alert System

Seat Customers Faster, Manage Staff Efficiently

It's easier to run a smoother, more efficient restaurant with the help of TableScout table status alert system. The bus or host staff uses TableScout's compact, hand-held transmitter in the dining room to update the table management software system without having to walk back to the host stand. TableScout helps you turn tables faster.

TableScout integrates with a table management system to deliver timely updates. With simple controls and a portable design, TableScout is convenient and easy to use. You'll also save on labor cost, serving customers better and faster with fewer staff members. Count on TableScout to help your staff deliver the best service possible.

TableScout Highlights

- > **Compact and Portable**
TableScout is super light-weight, includes a belt-clip and is convenient for employees to use for the entire shift.
- > **Labor Cost Savings**
Help you reduce the host staff without compromising the quality of service.
- > **Simple Controls**
Help staff learn to use the transmitter easily, quickly and intuitively.
- > **Rechargeable**
Just plug it into an electrical outlet and charge overnight.
- > **More Economical**
TableScout is a more cost-effective solution than handheld PDAs.
- > **Durable Design**
Withstands harsh restaurant conditions and provides reliable performance.
- > **Faster Table Turns**
Reduce guests' wait times, eliminate long lines and create a quieter ambience.
- > **Table Management Integration**
TableScout integrates with table management solutions like ProHost, QSR Automations, GuestBridge, Radiant.

The bus staff uses TableScout to keep the host informed of table status, resulting in faster table turns, smoother service, and decreased staffing.
